RULES

PURPOSE OF THE CONTEST

The theme of the **Matimex International Architecture Prize**, offered for the third time this year, is the **ARCHITECTURE OF BALANCE**. "Mens sana in corpore sano".

Juvenal's famous words remind us how important it is to maintain the proper balance between body and mind in order to enjoy life to the full.

Holistic well-being is an increasingly widely accepted concept in today's society, as we realise that we need to take care of our bodies just as we keep our minds trained; the two are parts of a single indivisible whole.

Many architectural spaces are partly or entirely dedicated to the attempt to achieve this balance: sports facilities, gyms, alternative treatment centres, spas, wellness hotels, beauty centres and so on, as well as centres dedicated entirely to health and medical treatments. But we are confident that there are still many ways of exploring this field of architecture and interior design.

The idea is to design a new space or reclaim an existing space of one or more of the following types, or a space inspired by the main theme of the contest: "**The architecture of balance: Mens sana in corpore sano**".

To give contestants an idea of some of the types of building that may be admitted to the contest, a list of examples follows.

The architecture of balance

Mens sana...

Places for reflection, study and care of the mind.

- . Libraries.
- . Educational centres.
- . Spaces for meditation-reflection-study.
- . Religious spaces.

... in corpore sano.

Spaces dedicated to the body and to physical wellbeing, considered in terms of recreation or medical care.

- . Gyms.
- . Sports facilities.
- . Spas.
- . Alternative treatment centres.
- . Beauty centres.
- . Medical centres: health centres, clinics, hospitals, doctors' offices.

Without excluding projects combining both of the above aspects:

- . Wellness hotels.
- . Day care centres for seniors.
- . Educational centres for boosting mental and physical development.

All other projects which may reasonably be considered to respond to the criteria identified in the contest rules.

DESCRIPTION OF THE PROJECT

PURPOSE OF THE CONTEST

The theme of the **Premio Internacional de Arquitectura Matimex** or Matimex International Architecture Prize, held for the third time this year, **THE ARCHITECTURE OF BALANCE**. “Mens sana in corpore sano” - Juvenal, 1st century AD.

The poet Juvenal's famous words remind us how important it is to maintain the proper balance between body and mind in order to live life to the full.

Holistic wellbeing is a concept with increasingly deep roots in today's society. We ought to take care of our bodies just as we keep our minds in form, for they are two inseparable parts of a single whole.

Many architectural spaces are partly or entirely dedicated to the attempt to achieve such a balance: sports facilities, gyms, alternative treatment centres, spas, wellness hotels, beauty centres and so on, in addition to facilities dedicated entirely to health and medical treatments. And yet we are confident that there are still many new ways of exploring this field of architecture and interior design.

The idea is to design a new space or reclaim an existing space of one of the following types, or inspired by the key theme of the contest: **“The architecture of balance: Mens sana in corpore sano”**.

Below is a list of examples of types of project which may be submitted for the contest.

The architecture of balance

The project must establish a relationship with its surroundings, whether real or fictitious. This relationship must be clearly expressed in the graphic or written documentation, in the title and in the intentions of the project submitted.

CHARACTER OF THE PROJECT

There are no limits or restrictions on the size of the project. Depending on the type of project selected by the contestant in relation to the theme of the Architecture of Balance, the proportions of the project will be determined in response to the particular features of the project and its setting.

ASSESSMENT CRITERIA

The judges will adopt the following assessment criteria:

- Creativity of the general project concept and consistency of project criteria.
- Quality of the presentation of the space.
- Originality and adaptation in use of **Iris Ceramica Group** materials, particularly large ceramic slabs from any of the following collections:
 - Fiandre Maximum.
 - Iris Hilité.
